Quality education for the children of Mexico.
Why we do what we do?
1 of 2 Mexican children has lag in his educational development

Source: educacionfutura.org
8 out of every 10 indigenous children have an inadequate level of learning.

Source: INEE 2016
Mexican teachers are outdated since their initial training.

Our mission is to improve the quality and equity of the education in Mexico.
And we believe that every child in Mexico needs access to a quality education in order to build their own future and change their lives.
How do we do it?
We empower the teachers so that they can integrate technology into their classes; this is done by the support of a trainer who is present in the school for one school year.
What do we do?
We develop **digital skills** within the teachers and students.
We equip media labs with technological devices.
We develop **critical thinking** in students.
We provide access to digital educative contents, advice and technical support.
Where do we do it?
In public schools in Mexico

Urban school

Rural school

Indigenous school
**Presence of UNETE in the country**

- **2,776,578 students**
- **113,756 teachers**
